

THE CELESTIAL RANGE BY CANVERA

Driven by an unending passion for innovation, Canvera has introduced its most exclusive photobook yet, the Celestial Range, embellished with crystals from Swarovski. We are the first photobook company to have a licensing agreement with Swarovski, the world's premier crystal jewellery brand. Adorned with over 800 crystals and 150 hours of handcrafting taken to it, the Celestial Range embodies the beauty of eternal love in the most glamorous way.

Swarovski has been the premium brand for fine crystal embellishments for over 127 years. Available in a plethora of colours, effects, shapes and sizes, crystals from Swarovski are born out of a passion for detail and high-precision cutting. Also, the Crystals from Swarovski Seal, with a unique identification number to reinforce authenticity, enables customers to distinguish products embellished with genuine-Swarovski crystals.

swarovski crystals

HOW TO SHOWCASE THE PHOTOBOOK?

The strength of the Celestial Range lies in its design and presentation.

While presenting, follow the given instructions for a maximized impact.

* Display the product only with suitable lighting conditions.

* Ensure the book is placed in angles that best reflect the lighting onto the crystals.

* Show the product in the proper manner; from taking out from the bag to opening the flap case to opening the coverpad. A beautiful product needs a flawless presentation.
